Re: Docket 99P-0033/CP1

Dear Commissioner Henney:

I am demanding that the FDA act on the HFA (Humane Farming Association) petition to put an end to the practice of feeding dead pigs, horses, and other animals to other farm animals.

As a consumer, I am greatly concerned, since this practice can lead to Mad Cow disease and mad cow type diseases. There is compelling scientific evidence about the dangers of feeding dead animals to farm animals. I

understand that pigs in this country are known to have exhibited symptoms of central nervous system disease suspected as being TSE, and have proven susceptible to TSE in laboratory tests.

Animal feed should not contain meat or meat by products for farm animals anyway, since they are not meat eaters!
